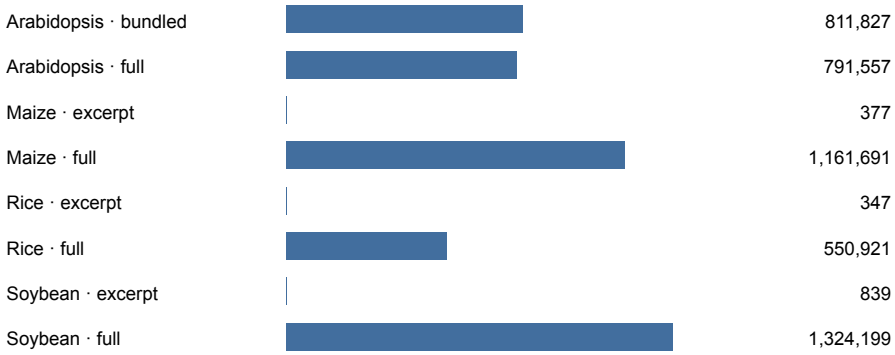
Figure S1. Public-data evaluation and supporting checks

A Evaluation coverage

	Full import	Search / structure	Sequence gold	Expression matrix
A. thaliana	Tested	Tested	Tested	Tested
O. sativa	Tested	Tested	—	—
Z. mays	Tested	Tested	—	—
G. max	Tested	Tested	—	—
V. umbellata	Tested	Tested	Tested	Tested
A. paniculata	Tested	Tested	Tested	—
H. syriacus	Tested	Tested	Tested	—

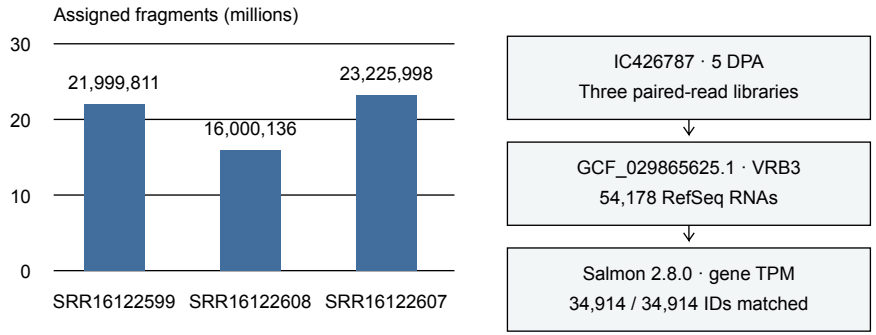
Sequence gold covers selected loci; "—" indicates not evaluated.

B Structural tuple inventories



4,641,758 recognized tuples; 0 missing; 0 extra.
Bars share a linear scale; counts are feature/relationship records.

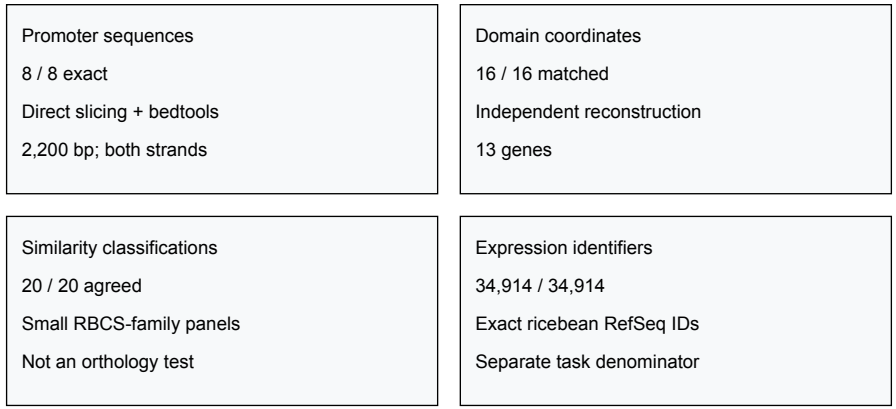
C Public ricebean expression and reference reconciliation



0 invalid/missing cells; each TPM column sums to 1 million within rounding.

IC426787 reads differ from VRB3: technical import/ID validation only.

D Independent module checks



Task-specific denominators are retained; no pooled accuracy score.
